Contact :- 9006613222, 9334487733

Email :-worldgreenline@gmail.com

MESSAGE FROM FOUNDER AND PRESIDENT

I take great pride in recognizing the credibility of my team members, without whom WGL would never have been established. Our journey began in 2014, and we have now completed the journey of 10 years a decade filled with struggles, learning, achievements, and growth.

It was our contributions and unwavering consistency that propelled us forward. Each small success has inspired us and kept our spirits high. Our passion for the environment deepened over time, instilling in us a strong sense of commitment. This led us to connect with others, as we believe that protecting our environment is a collective responsibility.

We assembled a team of highly motivated individuals and built a robust network of volunteers. Thus, we founded the organization known as WGL and successfully registered it, obtaining all the necessary certifications.

Planting **400 trees**, reducing landfill contributions by **25,000 kg** through cloth donations, and conducting impactful awareness campaigns are just a few milestones we achieved this year. These accomplishments are the fruits of tireless efforts by our volunteers, members, and supporters. Every step we took was guided by the vision of creating a greener, healthier planet for current and future generations.

At World Green Line, we believe that meaningful change is only possible when communities come together to act. This year, we saw remarkable participation from schools, local communities, and partner organizations in our programs. Initiatives like the Global Cycle Ride for Climate Change, awareness sessions on water crises, and environmental literacy camps reflect our unwavering focus on addressing pressing environmental issues.

I extend my heartfelt gratitude to everyone who contributed to our mission—our dedicated team, generous donors, and enthusiastic participants. Your belief in our vision fuels our determination to create lasting impacts.

As we look ahead, our journey is far from over. There is still much work to be done. With renewed vigor and your continued support, I am confident we will scale greater heights and make even more significant strides in the years to come.

“
**Together, let us plant hope,
nurture progress, and grow a
better tomorrow.**

ROAD MAP

Vision

To be the only name at the top in the list of NGOs imparting the platform where society, government and commercial bodies can come together to work for the conservation of the environment and win against all the odds and ill effects of nature.

Mission

To spread awareness about the need of environment conservation in the society in an educative manner, so that people can have self-cognizance about their responsibility towards the nature. We do take the initiative and remain active for ever ending environmental activities like plantation & afforestation, waste management, conservation of water bodies, innovative agricultural practices and ensuring the optimal use of all the natural resources and not taking them granted.

Objectives

The objectives on which WORLD GREEN LINE is significantly committed to work are:

- To educate the society on different stages about environment conservation in 360-degree manner.
- To work on each factor causing harm to the nature like, deforestation, use of plastic bags, exhausting and polluting water bodies.... etc.
- Conducting awareness programs to bring behavioral change in people about waste management.
- Making plantation a day-to-day activity.
- To impart a platform where people can talk and change their attitude about their optimal health by performing environment friendly work.
- Promoting innovative agricultural practices.

Creating micro-employment at the base of the pyramid by causing skill development in people and innovative agricultural practices to use the environment as a nature friendly resource, which can cause its potential expansion for generating employment like, making leaf vessels, bamboo basket etc.

World Green Line
Karan
President

Areas of commitment

WORLD GREEN LINE is committed to work in the following areas: -

- All the environment concern factors.
- Cleaning, protecting, and recharging all the social water bodies including rivers.
- War against plastic like, abolishing the use of plastic and opting for biodegradable products (paper, leaf, jute...etc.).
- Plantation under OXYGEN BANK Project.
- Imparting platform for Skill Development.
- Generating micro-employment like, making paper bags, jute bags, leaf vessels, bamboo baskets& other products, collecting and recycling all kinds of wastes (plastic, glass, wet, dry. Etc).
- Educating people about sanitation measures (e.g. Toilet, sanitary pad, using hand wash, sanitizing hands and households. Etc.)
- Rooftop farming, Kitchen gardening & Promoting Orchard (Fruit garden).
- Promoting Organic farming.

Recognition

- Paryavaran Sanrakshak Purashkar 2021 By Steel Authority of India, Bokaro.
- Covid- 19 By Chas Municipal Corporation.
- Participation Certificate For Six Waste rules 2016 by Ministry of Environment, forest and Climate change Gov. of India.

VALUES AND POLICIES

HR policy

In case of need of any manpower WORLD GREEN LINE discusses the requirement in governing body meetings. If the proposal gets an approval of 2/3rd of the members then the recruitment is done. Though the organisation tries to make it possible by its own members and volunteers in order to save funds yet it is done for a short term or temporary appointment. We do have the option to get manpower as permanent employee if it becomes impossible to manage by the above manners. We do adhere to the guidelines for the recruitment and protection of employees provided by the law of the land (India), which are as follows:

Subhash
President

Procurement policy

We are committed to procure any equipment ensuring the financial stability of the organization. Procurement is always done according to the fund, budget and use of the equipment.

Planning and execution

Survey

WORLD GREEN LINE first conducts a proper survey of a particular place in order to point out the environment concern issues. After pointing out the issues the concerned government officials are consulted to take a view on the issues. Finally, we start our work.

Factual study

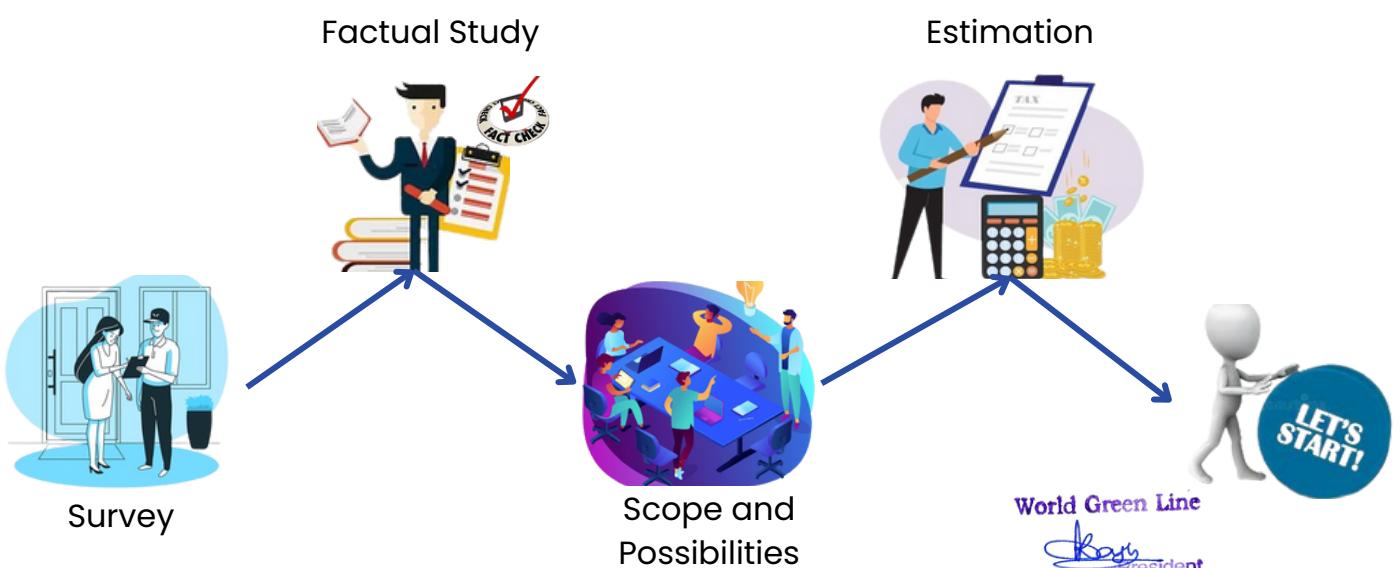

We prepare a data sheet on the basis of factual study of the projected place. This helps us in estimation of time, expenses...etc.

Scope and possibilities

On the basis of factual study, it becomes easy to forecast and look forward to the project scope and possibilities of the place.

Estimation (Time, Budget...etc)

Finally, estimation of time, manpower and budget of the project is done.

ONGOING PROJECTS

LETS CHANGE URBAN ENVIRONMENT

This endeavour aims to inspire and engage the community of Chas in fostering a healthier and more sustainable environment through a variety of activities.

- **Waste Management:** As the part of our initiative, we emphasize the importance of segregating waste into dry and wet categories. By doing so, we can efficiently manage and recycle our waste, reduce our environmental issues.
- **Rooftop/Kitchen Gardening:** Encouraging urban agriculture is another cornerstone of our project. By promoting rooftop and kitchen gardening, we empower residents to cultivate their own produce, contributing to food security and greening our cityscape.
- **Water Conservation Awareness:** Water is a precious resource, and it is crucial that we use it wisely. Through educational initiatives and awareness campaigns, we seek to enlighten residents about the importance of water conservation and simple practices that they can adopt to reduce water consumption.

Activities done in 2023-24

- No. of Awareness and distribution on sanitation and hygiene - 4
- No. of Awareness and Cleaning Programs - 6
- No. of Hand Wash Programs - 2

Other social welfare activities

- Blanket Distribution
- Copy, Pen and Carpet Distribution
- Environment Literacy Camp

World Green Line

President

OXYGEN BANK

The project seeks to raise awareness about the vital importance of maintaining adequate oxygen levels in our atmosphere through the following activities:

- Encouraging individuals to plant trees on their own premises open areas.
- We have been doing plantation in Bokaro district since 2016.
- Awareness to stop burning dry leaves and other wastes in open areas.
- Awareness to stop forest fire.
- Running campaigns to minimize the excessive use of tree resources and fight against deforestation.

Activities done in 2023-24

- No. of Awareness for Air pollution - 3
- Global Cycle Ride for inspiring Climate Change
- Awareness for Reduce Carbon Emission
- Awareness on Forest Fire
- No. of Plantation or Distribution of plants - 400

SWACHH GARGA ABHIYAN

River Garga originates from Kalandi Pond Kashmar and joins the Damodara river at Pupunki. We have been working on this project since 20th March 2018.

This includes the following activities: -

- Cleaning campaign of Garga River for encouraging the dependents.
- Conducting awareness program about the benefits of rivers.
- Asking people of all the sections to come together for the accomplishment of the project.
- Awareness programs in schools and colleges.

Activities done in 2023-24

- No. of awareness program – 4
- No. of community meeting - 2
- School Awareness- 4

World Green Line
President

WAR AGAINST PLASTIC

Plastic is a non-biodegradable substance which causes toxic effect on land, water, and human and rest all other creatures. It is very important for the people to understand the adverse effect of plastic. So we conduct awareness programs like:

- Awareness about plastic waste management.
- To stop burning plastic waste.
- To promote the replacement of plastic disposals (glass, plates, bowls ...etc.) with dishes made of leaves.

Activities done in 2023-24

- 4 Awareness programs were organised.

VASTRA DAN (14TH OF NOVEMBER - 2023)

This project specially aims to understand the meaning of optimal and sub-optimal use of resources. Despite possessing required number of clothes, human tendency persuades people to buy more, which causes unusual and unnecessary demand leading to inflation in the market. It creates a divide in the society. One side people with many and another side people with any. In such scenario, Vastradaan (old clothes donation) works as an initiative to bring a little equilibrium in the society. People with many donate to the people with any and help to change the sub-optimal use into optimal use of resources.

- Old clothes distribution program among tribal people at Kedla, Kashmar Block.
- No. of clothes distributed – 5,000
- Old clothes collected by volunteers and Prateek Dry Cleaners

World Green Line

President

Major Initiatives

Initiative	Objective	Activities	Outcomes
Plantation Drives	Enhance greenery and combat environmental degradation.	Planting 400 trees across various locations.	Boosted local biodiversity and improved the green cover in targeted areas.
Plastic Waste	Proper waste disposal and reducing landfill waste.	Plastic Waste Collection: 38 kg of plastic collected.	Reduced plastic waste.
Community Support and Distribution	Provide support to underprivileged communities.	Distributed 150 blankets to the needy during winter. Gave educational supplies (copy, pen, carpet) to 30 children. Donated 5,000 clothes to families in need.	Improved living conditions supported education for children. and Reduced landfill through cloth donations.
Volunteer Engagement and Internships	Engage and train individuals in environmental conservation.	11 new volunteers joined. Conducted internships for 18 participants.	Strengthened organizational capacity and provided hands-on experience for interns.

World Green Line

Awareness Campaigns	Raise awareness on key environmental issues.	Conducted 3 air pollution awareness sessions. Organized Global Cycle Ride. Held forest fire prevention sessions. Conducted water crisis seminars in schools. Sanitation, hygiene, and water crisis awareness programs.	Increased awareness on water conservation and other environmental issues among schoolchildren and communities.
Educational and Literacy Programs	Promote environmental knowledge.	Organized an Environmental Literacy Camp with 260 participants.	Enhanced understanding of environmental issues among attendees.
Community Engagement	Encourage collaborative environmental problem-solving.	Conducted 2 community meetings to discuss local environmental concerns.	Fostered greater community involvement in addressing environmental challenges.
